Empathy Map

The empathy map helps understand the user's perspective by identifying what they say, think, do and feel while trying to cope with confusion, frustration and anxiety in a digital learning environment. These insights guided the development of an AI-powered solution focused on emotionally aware, personalised learning support.

SAYS • I keep re-reading but it's not making sense. • I give up. • Oh wait, I think I get it now! • Am I the only one struggling with this?	THINKS • I don't understand this topic. • Am I the only one struggling? • This is taking too long. • Will the AI actually understand how I feel?
PERSONA NAME Student (B.Tech Student / Learner)	
FEELS • Confused and frustrated when concepts don't click. • Anxious about falling behind or failing exams. • Curious and eager to explore new ideas. • Excited and relieved once a topic finally makes sense.	DOES • Re-reads material repeatedly without much progress. • Asks the same question in different ways. • Disengages or abandons the session when stuck. • Compares own pace and understanding with peers.
