

Performance Testing

Date	10 july 2026
Team ID	XXXXXX
Project Name	Emotion-Aware Learning Support Engine
Maximum Marks	5 Marks

Step 1 : Testing Overview

Field	Details
Testing Tool Used	Manual Functional Testing (Streamlit Application)
Type of Testing	Functional & Performance Observation
Target Module / API	Text Upload, Emotion Classification, Guidance Generation, Dashboard
Test Environment	Windows 11 • Python 3.10 • Streamlit (Local)
Test Date	14 July 2026

Step 2 : Test Scenarios

S.No	Scenario	Users	Duration	Expected Outcome
1	Launch Application	1	2 sec	Home page loads successfully
2	Submit Text Query	1	5 sec	Input accepted successfully
3	Run AI Analysis	1	8 sec	Emotion classified & guidance generated
4	Regenerate Guidance	1	4 sec	New guidance generated successfully

Step 3 : Observations

The application completed all test scenarios successfully. Text input, emotion classification (BiLSTM+DistilBERT), Gemini API integration, and analytics dashboard rendering worked without critical errors. Inference latency stayed well under the target limit.

Step 4 : Screenshots / Evidence

Screenshot 1: Home Page

Screenshot 2: Text Input Panel

Screenshot 3: AI Evaluation Result
